SUMMARY

Frontend developer with 1 year of full-time experience. I dabble in cloud-technologies and backend development through personal projects and setting up minecraft servers on cloud services.

SKILLS: Frontend Development - React.js, React Testing Library, Jest

LANGUAGES: TypeScript, C++, Python

TOOLS: PostgreSQL, MongoDB, Node, Git

EDUCATION

University of California, Davis

GPA: 3.98/4.00 | Sep 2021 - Jun 2025

B.S. Computer Science | B.S. Statistics | Minor in Technology Management

EXPERIENCE

Veeva Systems | Pleasanton, CA | React.js, TypeScript, React Testing Library

Aug 2025 - Present

Associate Software Engineer - UI Components

- Development and documentation of internal UI Component library used by 30+ teams at Veeva
- Shape library-wide API design decisions as one of the team's go-to TypeScript experts
- Implement Passkey Authentication and Captcha for Veeva's single sign-on solution

Software Engineering Intern - UI Components

Jun 2024 - Sep 2024

- Upgraded UI Infrastructure to support deploying Storybook (UI Documentation) to AWS S3 for each build

IGN Entertainment | San Francisco, CA | GraphQL, PostgreSQL

Jun 2022 - Aug 2022

Software Engineering Intern

- Developed Google Optimize A/B tests ran on 1000+ users to improve site usability
- Independently built GraphQL backend support for game activity tracker for IGN hack day

Advantech | Milpitas, CA

Jul 2021 - Aug 2021

Information Technology Intern

- Implemented shell scripts to optimize and automate repetitive IT tasks
-

LEADERSHIP

Include at Davis

President

Jun 2023 - Jun 2025
